

Fairfield Glade Rotary Welcomes Cumberland Medical Center

Rotarian Susan Parsons introduced members of the Cumberland Medical Center Staff at a special luncheon held at Good Samaritan Society at Fairfield Glade. Villa Edwards, Executive Director of Therapeutic & Diagnostic Services at Cumberland Medical Center, discussed the health risk of Breast Cancer occurring in men. Each year 2,140 men are diagnosed with breast cancer. She explained the importance of self exams by women and men in the early detection of this cancer. Also apparent is the heredity factor, as in a woman, a man with breast cancer in his family is more at risk. Ms Edwards then proudly announced the new Digital Mammography Department at CMC will be opening soon.
